IT Services & Solutions

Quantum Sphere Technologies

At QST, we deliver flexible, secure, and scalable IT solutions across government agencies, healthcare systems, and commercial enterprises. From expert staffing to cybersecurity, our services are designed to simplify operations, strengthen infrastructure, and accelerate results.

IT Staffing & Talent Acquisition

We help you quickly fill critical skill gaps with experienced IT professionals - from a single developer to full-scale technical teams. Our talent network includes developers, engineers, administrators, architects, and project leads, each rigorously vetted for technical and cultural fit.

We support:

- Contract, contract-to-hire, and direct placements

- Staff augmentation for ongoing operations or short-term initiatives

- Specialized skill acquisition for emerging technologies

- Agile and DevOps team structuring

QST brings the right people to the table - fast, qualified, and ready to contribute on day one.

Technical Consulting

Our consultants offer hands-on expertise and strategic insight to guide your IT vision and execution. Whether you're navigating cloud migrations, software modernization, or hybrid environments, we help architect, plan, and implement the right-fit solution.

Consulting areas include:

- Infrastructure architecture & modernization

- Application lifecycle & integration

- Business continuity and disaster recovery planning

- Digital transformation & technology strategy

Our goal: align IT with your mission, not the other way around.

Infrastructure Support

Your systems need to stay up and running - and we're here to ensure they do. We provide remote and on-site support for networks, endpoints, servers, databases, and core infrastructure components, with the scalability to support agencies, enterprises, and multi-site organizations.

We deliver:

- Proactive maintenance and patching

- Server, endpoint, and network troubleshooting

- Helpdesk operations and escalation workflows

- Inventory and asset management

Reliability starts at the infrastructure level - and we build it in from the ground up.

Cybersecurity Services

We don't wait for threats - we prepare for them. Our cybersecurity services cover proactive risk management, identity and access management (IAM), endpoint security, and compliance strategy to protect sensitive data and systems.

Key areas:

- Threat detection and incident response

- IAM implementation and governance

- Firewall, VPN, and secure access control

- Compliance support (HIPAA, NIST, FISMA, etc.)

Your mission needs protection. QST provides it with strategy and execution.

Cloud & Systems Integration

We help you leverage the cloud while making sure it integrates cleanly with the systems you rely on. Whether

migrating from on-prem, building hybrid environments, or deploying new SaaS platforms - we ensure security, usability, and efficiency.

We support:

- Azure, AWS, and multi-cloud environments

- Cloud migration planning and execution

- App, system, and API integration

- Identity and access sync

Don't just move to the cloud - make it work for you.

Ongoing IT Support & Managed Services

IT isn't one-and-done - it requires day-to-day expertise. QST provides managed services and flexible support packages tailored to the needs of your agency or organization, from 24/7 monitoring to on-call experts.

We offer:

- Tiered user support (L1-L3)

- Remote IT helpdesk solutions

- Scheduled system audits and optimizations

- Performance tuning and capacity planning

We handle IT - so you can focus on your operations.
